

SliderMouse Pro

Ergonomic results and crisp design with navigation bar

Meet Contour's newest family member. The SliderMouse Pro is a centered mouse that allows you to do desk work in comfortable, ergonomic positions – even without stretching, twisting and straining. Our new cursor navigation with the intuitive mechanical navigation bar is integrated on top of the SliderMouse Pro, allowing your hands the freedom to rest snugly on the entire width of the mouse. To make it your own, we have made it seamless to design it to match your preferences with magnetic wrist rests in various sizes and materials.

SliderMouse Pro is designed and developed in Scandinavia in collaboration with ergonomic experts. It is a product inspired by the Nordics, which you can see in the minimalistic approach that unites functionality with the aesthetic.

Take care of your body

With a centered mouse, your arms are placed in a natural, relaxed position in front of your body. This supports a tension-free posture for shoulders, arms, and elbows that completely changes your ergonomic working position. Now, you can use both your right and left hand for cursor navigation. Also, you can control the clickable navigation bar with a slight touch of your fingertips and have all your favourite functions within short reach.

Customize to your needs

You can customize the SliderMouse Pro to your individual preferences with the unique magnetic wrist rests, allowing you to quickly switch between various models without using any tools. Our wide selection of wrist rests is designed to support your physical needs and stylistic desires. Change click sounds, cursor speed, and click resistance with ease – you know what suits you best.

Easy installation

Connect the SliderMouse Pro to your PC or Mac via Bluetooth, the USB receiver or cable, depending on your preferred method. Suitable for any keyboard size. Control multiple screens and customize the programmable buttons to your favourite shortcut functions.
