

C RollerMouse Pro

Combining design and functionality for ergonomic impact

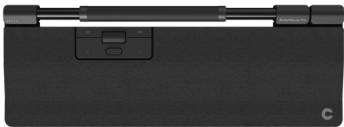

With RollerMouse Pro, you control everything; cursor navigation, programmable buttons and a large scroll wheel all centralized right in front of you. Built to prevent you from stretching, twisting and straining. Connect the RollerMouse Pro to your PC or Mac via Bluetooth, the USB receiver or cable depending on your preferred method. Fits both full-width and compact keyboards. Control multiple screens and customize the programmable buttons to your favourite shortcut functions. Seamless to customize with the magnetic wrist rests that come in different sizes and materials. All hard plastic parts made by 100% PCR plastic and certified packaging.

Two hands are better than one

With a centered mouse, your arms are placed in a natural position in front of your body. This removes tension on shoulders, arms, and elbows, giving you a more comfortable and ergonomic working position. It allows for variation, as you can use your right and left hand for cursor navigation while controlling the clickable Rollerbar with a slight touch of the fingertips. Simply put, you have all functions within reach.
